

STRIPED DONKEY

We do the heavy lifting.

Connected. Longitudinal. Certified.

Synthetic city data where households, education, employment, health and economic activity belong to the same lives.

LEGAL & LICENSING

Acceptable Use Policy

1 document page · Branded download edition

Read the documented coverage, findings and limitations alongside the data. Certification applies to the scope stated in the accompanying report.

Acceptable Use Policy

Version 1.0 | 6 September 2026

Use synthetic records responsibly and within the licensed scope.

1. Keep synthetic data identifiable as synthetic

Do not present an FCTE resident, organization, event or transaction as a factual record about a real person or entity. Preserve release context and synthetic-data labeling in demonstrations, publications and downstream outputs. Do not attempt to identify real individuals from synthetic records or use them to impersonate anyone.

2. Use within the agreed purpose

Use the materials only for the purposes and users authorized in the accepted order. Validate suitability for the intended question and retain the assumptions, known limitations and evidence used. A certification report addresses its disclosed checks and release scope; it is not approval of every downstream use.

3. Protect people and systems

Do not use the materials for unlawful discrimination, fraud, deceptive identity claims, unlawful surveillance, or infringement of others' rights. Do not use a synthetic record as a basis for an adverse decision about a real individual. Consequential applications require suitable real-world validation, safeguards and qualified oversight.

4. Protect access and report issues

Do not bypass access restrictions, expose licensed records through public repositories or insecure services, or remove required notices. Report suspected material defects, unauthorized disclosure or security issues to fidelra.africa@fidelra.ai with the release and affected scope. Share only the minimum information needed to investigate.
