## Progressive multi-domain savings

Domains are ranked from highest to lowest list price. The first receives no discount; subsequent positions receive 2.5%, 5%, 7.5%, 10%, 12.5% and 15%. Savings are rounded separately for each domain. Eight or more domains require a custom quote.

Example: Health \$9,995 + Demographics \$8,995 - \$225 savings = \$18,765 before taxes.

# License & delivery summary

Standard marketplace purchase summary. The applicable license and accepted order define the final rights and delivery scope.

## One licensed entity

Standard rights are non-exclusive, non-transferable and for one legal entity's internal use of the identified purchased release.

## One secure download entitlement

Standard fulfillment is one secure download package. Failed or corrupted transfers may be reissued without creating an additional license.

## Future releases separate

Future regenerated releases, recurring refreshes, API access and expanded delivery methods are not included unless expressly ordered.

## No raw-data redistribution

Resale, sublicensing, public repository upload, raw-data publication and transfer to another legal entity require separately granted rights.

## Synthetic-data limitation

FCTE represents synthetic analytical records, not factual histories of real people, and must not be represented or used as real-person records.

## Services do not expand rights

AI/ML, research, BI, query, integration, executive-insights and support services do not modify the underlying dataset license or redistribution restrictions.

Commercial summary only: Final purchase is subject to the applicable FCTE Data License Agreement, order form/invoice, taxes and any separately scoped professional-services terms. Indicative delivery windows are confirmed on order acceptance.
