LAGOS / AUDIT & EVIDENCE REFERENCE

Event ablation report

Published categorical outcomes for historical-event backtests.

Source review: 10 October 2026

Source and scope
All eight Lagos historical-event signals are confirmed and implemented. Implementation status updated 10 October 2026. Numerical error scores and calibration parameters remain within the controlled methodology pack.

Recorded value	Meaning
8	Historical events
8	Confirmed and implemented signals
0	Outstanding outcomes

Read before use

All signals implemented

Each of the eight historical events listed in the report has a confirmed and implemented signal.

Public evidence boundaries

Historical event identities and implementation status are published. Exact error scores and calibration parameters remain controlled.

Published audit report · Read the scope with the result

Public audit view.

Release-level findings, evidence categories and outcomes are shown here. Internal identifiers, physical mappings, exact thresholds, calibration parameters, repair mechanics and orchestration remain controlled.

Audit summary

Backtest at a glance

Public event-ablation coverage and categorical outcomes.

Recorded source values
8 historical events tested
8 confirmed explanatory signals
0 other / review outcomes
2026-10-10 status updated

Ablation outcomes

Event-by-event public status

All 8 historical event signals are confirmed and implemented. The public site deliberately avoids publishing exact error deltas or model-response trajectories.

Historical event	Public validation outcome
FP2020 Commitment / Renewed Family Planning Push	Confirmed and implemented
Boko Haram Insurgency Displacement	Confirmed and implemented

Historical event	Public validation outcome
Structural Adjustment Programme (Nigeria)	Confirmed and implemented
National Policy on Population for Development	Confirmed and implemented
Nigerian Oil Boom	Confirmed and implemented
COVID-19 Pandemic (Nigeria)	Confirmed and implemented
Nigerian Civil War (Biafra)	Confirmed and implemented
Fertility Decline Stall/Rebound	Confirmed and implemented

Method boundary

Evidence is visible; calibration mechanics are not

External benchmark families, event identity and categorical validation status are public. Exact error scores, index-year selection, scenario curves, coefficients and recalibration values are part of the controlled methodology pack.

Source: release-level event-ablation validation against external fertility benchmark families. Exact scenario metrics and calibration parameters are withheld from the public website.

Keep the supporting record

Keep the applicable document version with your records. Contact Fidelra to discuss report context, source references and your intended use. Availability and rights for a paid data package are confirmed in the written quote.
