NAIROBI / AUDIT & EVIDENCE REFERENCE

Education evidence

Published Education evidence, examples and later review context.

Source and scope

This document reformats the supplied published source. Historical results and current-tense wording belong to that source context. It is not a new rerun or independent certification. People, histories and model counts are synthetic.

Read before use

Read the published scope

The report retains public findings and source context. Outcomes belong to the recorded review; this document is not a new rerun.

Public evidence boundaries

Internal identifiers, physical mappings, thresholds, calibration parameters and repair mechanics remain controlled where the published report says so. The PDF contains the supplied public report, rather than unpublished internal artifacts.

01 · Publisher update

Open findings.

Recorded 2026-09-09 · Publisher-reported; no independent rerun or full run artifact supplied.

Education has open findings. The age and duration reporting update is publisher-validated, but incomplete grade-year coverage and terminal enrollment issues remain.

Recorded source values
Incomplete grade-year cells 3
Active enrollments · city total 4,276,253
Active over 20 years · city total 812,986

• EDU-FIND-06 · OPEN Long-running terminal enrollments remain marked active; age and duration reporting now exposes this source state.

• EDU-FIND-07 · OPEN Outstanding per publisher update; a separate precise finding definition and closure were not supplied.

Age and duration counts are informational diagnostics. No hard failure threshold was established; complete age and duration tables were not supplied.

These full-city counts come from the publisher, not the selected demo extract. Diagnostic age thresholds are not hard failure gates. EDU-FIND-03 remains separately closed; its earlier 18/18 report is not the overall current Education status.
